Read the passage to answer question 6-10

Culture refers to a group's program for survival in and adaptation to its environment. The cultural program consists of knowledge, concepts, and values that are shared by group members through their symbols and systems of communication.

The United States, like other nations, has a shared set of values and symbols that form the core culture. This culture is shared to some extent by all the various cultural and ethnic groups that make up the nation. This core culture is difficult to describe because the United States is such a complex nation; it is easier to identify the core culture within an isolated premodern society. However, it is possible to assert that the political institutions reflecting some of the nation's core values were heavily influenced not only by the British but also by the Native Americans, particularly those practices related to making group decisions.

A key concept in the U. S. core culture is the idea that "all men are created equal." When the nation's founding fathers expressed this idea in 1776, their conception of men was limited. White men without property, white women, and all African Americans and Native Americans were excluded. While the concept of equality had a limited meaning at that time, it has proven to be a powerful idea in the quest for civil rights in the United States. It remains an important part of the U. S. core culture and is still used by victimized groups to justify their struggles for equality.

- 6. With which of the following statements would the author most probably agree?
 - A. People generally view culture in terms of survival.
 - B. Americans believe their culture is superior to others.
 - C. The cultural program of a society is established by its political institutions.
 - D. Most people in a country share certain core values.
- 7. Which of the following would NOT be included under the definition of "culture" in paragraph 1?
 - A. A Educational system
 - B. Concept of humor
 - C. Skin and eye color
 - Concept of human rights
- 8. In the under lined lines, in paragraph 2, the author suggests that:
 - A. the United States is an isolated premodern society
 - B. the culture of a premodern society is simpler than the U. S. culture
 - C. the United States has no core culture
 - D. very little is known about societies that have developed in isolation

- 9. The author implies that the original idea that "all men are created equal":
 - A. applied only to white men who owned property
 - B. included only people who were born in the United States
 - C. was a value shared by most Americans in 1776
 - D. was not part of the core culture until 1776

10.In paragraph 3, the author implies that:

- A. the struggle for equality is ongoing in the United States
- B. some people do not have to struggle for civil rights
- C. the idea that "all men are created equal" is not part of the core culture
- D. core values tend to victimize some groups of people

 - C. Low-intensity light bulbs are less expensive than more standard light bulbs.
 - D. The low-intensity light bulbs are as effective in providing light as standard light bulbs.
 - E. Low-intensity light bulbs have been shown to create less stress on eyes, and people using low-intensity light bulbs have fewer medical problems.

Sixty-five percent of the graduating class of Hamilton High School, a public high school in the middle of the city, will go on to attend college after graduation. The Harris Academy High School, an expensive private school in the same area, will send approximately 95 percent of its graduates to college. Many parents, realizing this information, believe that sending their children to Harris Academy High School will mean that their children will get a better education than they would get at Hamilton High School.

- 19. Which of the following statements, if true, would most indicate the flaws in the parents' reasoning?
 - A. Until 1992, Harris Academy High School was exclusively a girls' school, but Hamilton High School has always been coeducational.
 - B. Harris Academy High School requires students to pass an admission examination before entering, but Hamilton High School admits all applicants who live in the city.
 - C. Hamilton High School has problems with severe student violence during school hours.
 - D. Harris Academy High School has a higher percentage of students attending Ivy League colleges than any other high school in the state.
 - Hamilton High School receives its funding from local property taxes, while Harris Academy High School receives funding from tuition costs and from alumni donations.

Wine, cheese, butter, and raisins are all examples of early techniques to preserve food. In modern times, food scientists have developed other techniques such as dehydration, hermetic sealing, and radiation. Of these, radiation is the most controversial because preliminary studies have shown that radiation alters the natural chemical bonds in fruits and vegetables. Instead of providing salutary effects, eating radiated produce may well introduce irritating chemicals into the body, creating a possible health hazard.

20. Which of the following, if true, supports the conclusion that eating radiated produce poses a possible health hazard?

- A. Radiation affects only those chemical bonds associated with water, that is, hydrogen and oxygen
- B. Radiation kills microorganisms that hasten food decay
- C. The radiation-induced bonds are unlike any of those found in non-radiated produce
- D. Certain microorganisms, namely those found in yogurt cultures, are essential for proper digestion
- E. Radiation has no effect on foods preserved by drying
